I need to see these emails in some kind of native format, which means eml, msg, mbox, or pst exclusively. I will also need to see the attachments in their native formats, although they will be included automatically if the emails are exported to any of the formats listed. Please note that the html format in which you've previously sent me emails is not a native email format, does not produce copies of the records, and is not acceptable.

Thank you for your anticipated prompt and statutorily compliant response,
